Tobias Friedrich

AI Tech Lead | Empowering Teams Through AI and Agentic Systems
Augsburg, Bayern, Deutschland

Zusammenfassung

Hands-on architect and tech lead with 7+ years of experience shipping scalable, AI-driven products. I specialize in building end-to-end solutions, from cloud infrastructure to agentic AI systems, that solve real-world business problems. Passionate about leading small, agile teams to deliver high-impact results in fast-paced environments. My expertise spans: Cloud Architecture & SaaS Integration: Ensuring seamless integration and scalability for enterprise-wide adoption. Collaboration & Leadership: Aligning cross-functional teams and fostering a culture of innovation and continuous improvement. Data-Driven Insights: Applying engineering informatics and AI to optimize processes and enhance user engagement. With a background in mechatronics engineering and a master's focus on deep learning and artificial intelligence, I bridge the gap between technical complexity and practical solutions. My journey includes diverse global experiences, from developing motorsport telemetry systems in Japan to advancing computer vision techniques with generative models in Germany. I am dedicated to empowering teams, delivering scalable solutions, and pushing the boundaries of what's possible through collaboration, innovation, and data. Connect with me to explore ideas, exchange insights, and create a future fueled by technology and teamwork.

Berufserfahrung

Bosch

3 Jahre 8 Monate

Software Development Lead

Mai 2023 - Present (3 Jahre 1 Monat)

Stuttgart, Baden-Württemberg, Deutschland

Leading the technical development of a global, cloud-based user skills platform serving 400,000 associates. Responsible for designing and integrating scalable solutions in collaboration with a SaaS provider to support skills development, learning opportunities, and user engagement. My role involves:

- Coordinating in collaboration with cross-functional teams to align platform capabilities with organizational goals.
- Driving technical innovation to enhance platform scalability and usability.
- Ensuring seamless integration of cloud-based systems with Bosch's infrastructure.

Through this role, I empower teams and individuals to grow, learn, and contribute to a culture of innovation and continuous development.

Master Thesis

Oktober 2022 - August 2023 (11 Monate)

Hildesheim, Niedersachsen, Deutschland

Title: Test Case Creation for Computer Vision Algorithms using Generative Models.

The main focus is to use diffusion models to generate images as training data for computer vision algorithms.

The image creation is based on a new bounding box conditioning mechanism.

Bosch Engineering GmbH

6 Jahre 8 Monate

Software Developer

Oktober 2017 - August 2023 (5 Jahre 11 Monate)

Stuttgart und Umgebung, Deutschland

Development for base software functions for autonomous driving. Integration and development of safety relevant monitorings, configuration of AUTOSAR stack and test automation.

Development for CI/CT and Jenkins

Test Automation Engineer

Januar 2017 - September 2017 (9 Monate)

Development for a mechanism to structure automated test cases

Bosch Engineering GmbH

Software Developer

Juni 2016 - August 2016 (3 Monate)

Yokohama, Kanagawa, Japan

Development of the software for an integrated data logger device. This device is capable of logging all vehicle data from a CAN-bus and display it over a WLAN interface.

Bosch

Software Developer

Januar 2016 - März 2016 (3 Monate)

Stuttgart und Umgebung, Deutschland

Design and implementation for a remotely controllable, smart smoke detector.

The device can be controlled via gestured based motions.

Ausbildung

Universität Augsburg

Master's degree, Ingenieurinformatik · (Oktober 2020 - März 2023)

Duale Hochschule Baden-Württemberg

Bachelor's degree, Mechatronik, Robotik und

Automatisierungstechnik · (2014 - 2017)
